

(revenue requirement), the number of loops, and costs per loop. It also shows the expected HCLS payments for 2007, based on 2005 data, using the high-cost formula and the cap discussed above. The costs shown are embedded costs for all companies.⁴⁶ The final column shows the percentage of the total payments going to companies in the state.

Table 3.18 shows the changes, from the revised data for 2004 to the newly reported data for 2005, for state totals, of the unseparated NTS revenue requirement, the number of loops, the revenue requirement per loop, and the HCLS payments. The phrase, "payments in later year" in the last column refers to the fact that these are projections of payments to be made two years after the costs are incurred; in this case, in the years 2006 and 2007.

Tables 3.19 through 3.21 present state summaries of the revised historical information filed for 2001 through 2005 in the 2006 filing. Table 3.19 shows the unseparated NTS revenue requirements for each year. Table 3.20 shows the number of loops. Table 3.21 shows the unseparated NTS revenue requirement per loop.

The next several tables in this section are data for individual study areas. Tables 3.22 through 3.30 are derived from the USAC data. In each table, only payments made in 2002 through projections for 2007 are included. Also, only those study areas that received payments for the support mechanism covered by the table for those years are included in the table. Payments for 1998 through 2001 can be found in the 2006 *Universal Service Monitoring Report*. Table 3.22 has HCLS payments. Table 3.23 has safety net additive support payments. Table 3.24 has safety valve support payments. Table 3.25 provides, by non-rural study area, the high cost support using the forward-looking high-cost model support mechanism.⁴⁷ Table 3.26 has LTS payments. Table 3.27 has ICLS payments. Table 3.28 has IAS payments for price-cap companies. Table 3.29 has LSS payments. Table 3.30 has the total support payments for all seven programs. Each of these tables contains the annual amounts for only those years for which a support mechanism was in place. Table 3.27 has the final ICLS true-ups for 2002 through 2005, and Table 3.29 has the final LSS true-ups for 2002 through 2005.⁴⁸ The other numbers (except for 2007 data) are based on the actual payments, as reported by USAC, and include out-of-year adjustments for prior years. In all cases the 2007 total is based on the assumption that the fourth quarter amount will be the same as the third quarter projection. CETC study areas listed

46 The data submitted by NECA include payments that would have been made to non-rural carriers if the forward-looking high cost model had not been implemented, which form the basis of the hold-harmless calculations. Consequently the amounts shown in Table 3.6 are a better indication of the actual HCLS payments.

47 Companies getting hold-harmless support have those amounts shown in Table 3.22.

48 Final true-ups are completed about two years after the initial payments are made. See footnotes 43 and 44 for citations to the final true-up filings.

in the *USAC Filing for the Third Quarter of 2007* as being ineligible for support (because they applied for, but have not yet received, ETC status) have been excluded from these tables.

Tables 3.31 through 3.35 are derived from NECA's 2005 filing.⁴⁹ Table 3.31 contains individual study area data for 2005 for unseparated NTS costs (Revenue Requirement), the number of loops, and costs per loop. It also shows the expected HCLS payments for 2007, based on 2005 data, and the percentage of the national total HCLS that goes to the study area. For study areas that acquired exchanges from another study area and had to report the amounts for the acquired exchanges separately, the study area code is appended with an A for the data for the acquired exchanges. In the second column of Table 3.31, the types are cost (C) and average schedule (A), indicating the form of settlements used by that study area. The third column indicates whether the study area has been designated as rural (R) or non-rural (N). In addition to the name of the study area, the name of the holding company (if any) is also shown. The costs shown are embedded costs for all companies, and the payments shown include potential payments to non-rural companies that form the basis of hold-harmless calculations.⁵⁰ Table 3.32 shows the percentage changes from the previous year for each of these amounts for individual study areas. In the payments column in this table, the entry "INFINITE" indicates that the payment was zero in the first year and positive in the second year.

Tables 3.33 through 3.35 present individual study area data for the historical information filed for 2001 through 2005 in the 2006 filing. Table 3.33 shows the unseparated NTS revenue requirements for each year. Table 3.34 shows the number of loops. Table 3.35 shows the unseparated NTS revenue requirement per loop.

In compiling the historical data, it is necessary to account for changes that have occurred in the study areas over time. These changes are noted in Table 3.36.⁵¹ In cases where study areas have merged, the pre-merger data for all of the merged study areas have been combined and reported as the data for the surviving study area in Tables 3.33 through 3.35. In cases where there has been an ownership change resulting in a code number change, the pre-change data is reported under the new code number and name. In the case of newly created study areas, pre-creation data is reported as 0. In Table 3.32, percentage changes in the case of mergers are comparisons of the surviving study area data with the consolidated pre-merger data. In the case of sales of exchanges,

49 National Exchange Carrier Association, Inc., *Universal Service Fund 2005 Submission of 2004 Study Results* (October 1, 2005).

50 The data submitted by NECA include payments that would have been made if the forward-looking high cost model had not been implemented. Consequently, Table 3.22 is a better indication of actual HCLS payments.

51 Because the study areas were matched between years by study area code number, changes in only the name of the company are not included in this list. However, for name changes between 2004 and 2005, Table 3.32 shows the old name in parentheses.

for comparison purposes the data for the sold exchanges are consolidated with the data for the study area that divested them.

Each year NECA submits detailed account data used to calculate the unseparated revenue requirement per loop for each study area that settles on a cost basis, and total attributed revenue requirements for study areas that settle on an average schedule basis. In its filings since 1993, in addition to submitting such information for the latest year, NECA also submitted revised information for the four preceding years. The detailed account data are not reported here, but the most recent revision of the data for each year since 1988 is available in electronic form on the Wireline Competition Bureau Statistical Reports website www.fcc.gov/wcb/stats.
